**For Immediate Release**

**Sound Seal Wins CISCA 2011  
Construction Excellence Award**

**Charlotte, North Carolina.: April 23, 2012** – Sound Seal, a leading manufacturer of industrial and architectural acoustic noise control products announced today that they have received the Ceilings & Interior Systems Construction Association (CISCA) Bronze Award for Interior Finishes – West.

Sound Seal's WoodTrends products were used in the design of the new North Las Vegas City Hall. Sound Seal's Architectural Sales Manager David Gilbert, was on hand to receive the award.

Designed by world renowned Fentress Architects of Santa Monica, California, the North Las Vegas City Hall is a contrast in design to the architecture on display a short 10 minute trip down North Las Vegas Boulevard.

The warm, inviting atmosphere provides a refreshing counterpoint to the glitz and glamour that is a short distance away. The new North Las Vegas City Hall welcomes citizens into the first floor with over 9400 square feet of honey colored, custom stained, highly figured Anigre veneer WoodTrends panels.

The WoodTrends wood ceiling and wall panels, manufactured by Sound Seal, offer the beauty and warmth of real wood, creating an oasis in the desert for day to day business in the new city hall.

**About Sound Seal**
