

Sound Seal to Exhibit HVAC Lag Products at the 2015 AHR Expo in Chicago

Recent Acquisition of Industrial Noise Control Creates Improved Supply Chain Capabilities and Product Resources for Midwest Customers

AGAWAM, Mass. – January,21 2015 –

[Sound Seal](#), a leading manufacturer of acoustical and noise control products serving the industrial, architectural, commercial and construction industries, announced today that it will showcase its expanded line of HVAC Acoustical Duct, Pipe Lagging, and Panel and Barrier Systems at the 2015 [AHR Expo](#) in Chicago. As a result of the recent acquisition of Illinois-based noise control expert Industrial Noise Control (INC), Sound Seal has expanded its offering of HVAC duct and lag products and enhanced supply chain and service improvements to customers in the Midwest.

As the world's largest HVACR marketplace, the AHR Expo brings together over 2,000 exhibiting companies and 40,000 visitors, representing the entire spectrum of the HVAC industry. Sound Seal representatives will be on hand to discuss its wide range of HVAC Acoustical Duct, Pipe Lagging, Panel and Barrier Systems.

Designed to reduce the transmission of radiated noise through the walls of ductwork or piping, Sound Seal's [HVAC Acoustical Duct and Pipe Lagging](#) feature a reinforced-foil faced mass loaded vinyl noise barrier that bends around ducts and pipes for easy installation. As a result of the INC acquisition, Sound Seal will be offering a new lag stocking program that delivers faster turnaround and lower freight costs for customers in the Midwest region.

Sound Seal will also be showcasing two new solutions now being offered through the recent purchase of INC, [INC Panl-Wall®](#) Modular Acoustical Metal Panel System and ONB Modular Outdoor Noise Barrier System. The INC Panl-Wall Modular Acoustical Metal Panel System consists of pre-engineered, modular acoustical panels and components that can be configured and assembled into a wide variety of structures such as HVAC equipment compressors, chillers and pumps. It is particularly well-suited for HVAC applications requiring a high degree of noise reduction of up to 40 decibels or more. The INC Panl-Wall ONB Modular Outdoor Noise Barrier System consists of pre-engineered, modular acoustical panels that can be easily configured and assembled into enclosures, screens, partial enclosures and barriers for HVAC equipment screens.

By visiting the Sound Seal booth (2929), attendees can learn more about Sound Seal's HVAC Acoustical Duct, Pipe Lagging, and Panel and Barrier Systems. To set up a briefing, [follow this link](#) or use the contact information below.

About Sound Seal

Since 1978, Sound Seal has been a leading manufacturer of acoustical noise control products offering the widest product selection in the soundproofing industry with innovative solutions and outstanding customer service. Sound Seal consists of three product divisions: the Industrial Division that addresses in-plant noise control and

environmental noise control; the Architectural Division that handles interiors and finishes, including an award winning line of WoodTrends products; and the Impacta Flooring Division that offers floor underlayments.
