

Sound Seal Introduces CHROMA™ Paintable Acoustic Panels

AGAWAM, Mass. – February 18, 2019 – Sound Seal, a leading manufacturer of noise control products serving the industrial, architectural, commercial and construction industries, announced today the introduction of **Chroma Acoustical Panels**.

Chroma Acoustical Panels are the perfect solution where a traditional fabric finish is not desired. The acoustically transparent, paintable finish blends well with finished drywall to create a space absent of echo and reverberation. Rather than a textured finish of fabric, Chroma panels provide for an understated, more discreet acoustic finish within a space.

“We are very excited to add Chroma paintable panels to our acoustic panel offering. Whether you are looking to be discreet or bold in the design of your space, Chroma paintable panels offer the flexibility and optimized acoustic performance to meet the need,” said Dave Gilbert, General Manager for Sound Seal.

In addition to drywall match, **Chroma Acoustical Panels** can be painted using any pantone color. Sound Seal offers a permeable paint to accompany these panels for in-field application. These panels are available in a variety of shapes and thicknesses. Visit **www.soundseal.com** to learn more
