### Acoustical Underlayment for floated and glue down Wood flooring

CERAZORB® is a lightweight underlayment system that has been specially designed for floated or glue down wood flooring. CeraZorb offers high energy impact with low weight and will remain unchanged after repeated impact loads. CeraZorb is an underlayment made out of hemi-crystalline thermoplastic material that will not rot, swell, absorb water and is anti microbial. CeraZorb has been tested and has the performance equal to 1/2" natural cork at a much lower price. CeraZorb can be bonded to approved sub floors using Impacta T-950 bond coat adhesive.

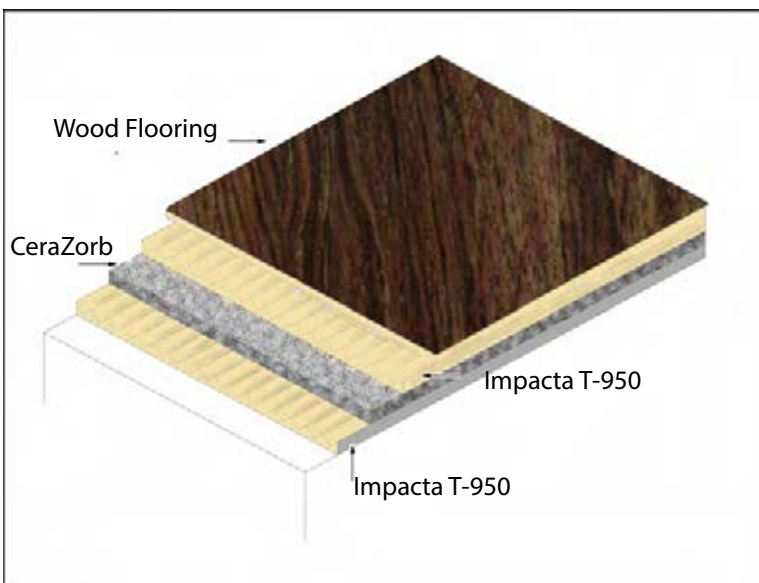

#### CeraZorb Benefits

- Up to 25 times lighter than 1/4" backer board
- "Synthetic cork product" **will not** rot, support mold & mildew or absorb moisture
- Available Thickness 3mm,5mm,10mm
- Lightweight and easy to carry
- Credible acoustical performance
- Delta IIC 22 on a 6" slab

#### Technical Data:

- Thickness: 3mm- 1/8"
- Sheet Size: 4' x 4'
- Qty Box: 40 sheets / 640 sq ft
- Weight: 28 lbs box
- R Value: 1.5
- Delta IIC 22 on a 6" concrete slab
