Sound Seal Introduces OSP-2, Outdoor Sound Panel:
An Affordable, Modular Solution for Exterior Noise Control

Agawam, MA – November 11, 2026 **|** Sound Seal, a Catalyst Acoustics Group brand and leading manufacturer of architectural and industrial noise control products, has expanded its industrial product offering to include the OSP-2, Outdoor Sound Panel. Designed to absorb and block unwanted noise, the panel is best suited for construction, oil and gas sites and similar environments where temporary noise control is necessary.

OSP-2 offers the adaptability to address unwanted noise without the complexity of a permanent solution. This makes OSP-2 a practical and cost-effective solution compared to more permanent industry standard curtains and blankets. With a simple installation process, these panels can be easily handled and repositioned when equipment moves, or site conditions change.

OSP-2 features an absorptive acoustical core with exterior-grade, UV-resistant heavy-duty facings engineered to withstand changing weather conditions and the harshest of exterior environments. Standard stocked material is available in approximately 4-foot-by-4-foot and 4-foot-by-8-foot sizes, streamlining order fulfillment without the extended wait and lead time associated with custom materials. Industrial-grade perimeter grommets make OSP-2 easy to mount over fencing or on brick and masonry walls, while the modular design allows panels to be oriented and combined to achieve any desired barrier height on fencing, scaffolding and other similar surfaces.

“Sound Seal has a strong history of providing permanent noise control solutions, but we recognized that not every project requires a permanent system,” said Mark Rich, Vice President of Sales and General Manager at Sound Seal. “OSP-2 fills that gap in the market with a versatile solution that customers can easily install, move, and adapt to any application.”

For more information about OSP-2 and Sound Seal’s complete line of noise control solutions, visit soundseal.com or contact the Sound Seal sales team.

About Sound Seal
Since 1978, Sound Seal has been a leading manufacturer of acoustical noise control products, offering the widest product selection in the soundproofing industry with innovative solutions and outstanding customer service. Sound Seal consists of three product divisions: the Industrial Division that addresses in-plant and environmental noise control; the Architectural Division that handles interiors and finishes, including an award-winning line of WoodTrends products; and the Impacta Flooring Division that offers floor underlayment's.
