Sound Seal Introduces BioCore™ Acoustical Wall Panels to Sound Quality® Architectural Product Line

Agawam, MA **– June 15th, 2021 -** Sound Seal, a leading manufacturer of noise control products serving the industrial, architectural, commercial and construction industries, is pleased to announce the addition of BioCore Acoustical Wall Panels to their acoustic wall panel offering.

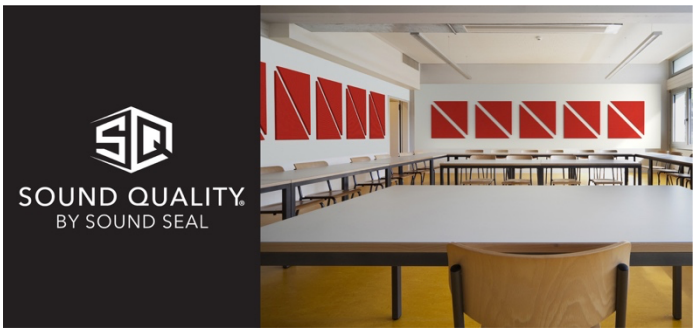

BioCore Acoustical Wall Panels are manufactured with an ECOSE® Technology based brown-colored fiberglass core composed of 60% recycled content. ECOSE® is a revolutionary, formaldehyde-free binder technology, based on rapidly renewable materials instead of the petro-based chemicals that are traditionally used in fiberglass. BioCore Panels do not include phenol, acrylics or artificial colors- delivering superior environmental sustainability.

With a variety of options to choose from including sizes, shapes, fabrics and colors, it is easy to create the perfect solution for reverberation issues. BioCore Acoustical Wall Panels are designed to solve acoustical needs while enhancing the aesthetics of the space.

"We are excited to offer a product that not only provides acoustic and aesthetic solutions, but also consists of an environmentally friendly core," said Dave Ingersoll, Vice President of Sales for Sound Seal. "The core of BioCore Panels is GREENGUARD Gold Certified and LEED Eligible."

Available in 2 styles, Standard and High-Impact, BioCore Acoustical Wall Panels offer solutions for a wide variety of applications.

Sound Seal will be hosting a weekly webinar series on BioCore Acoustical Panels throughout June and July. Please visit www.soundseal.com to register and learn more.

About Sound Seal
Since 1978, Sound Seal has been a leading manufacturer of acoustical noise control products, offering the widest product selection in the soundproofing industry with innovative solutions and outstanding customer service. Sound Seal consists of three product divisions: the Industrial Division that addresses in-plant and environmental noise control; the Architectural Division that handles interiors and finishes, including an award-winning line of WoodTrends products; and the Impacta Flooring Division that offers floor underlayments. Please visit soundseal.com to learn more.
