

UNDERLAYMENT FOR SHEET, VINYL, VINYL PLANK, LVT, LCT, CORK, LINOLEUM & CARPET TILE FLOOR

Jumpax Waterproof is a dry-leveling, waterproof, fast track floor preparation system used in both renovation and new-build construction. Jumpax provides maximum sound reduction and a super smooth surface for immediate glue-down of any resilient floor coverings such as luxury vinyl tile, linoleum, rubber, cork or even carpet.

The Jumpax system is a free floating sub-floor suitable for commercial and residential use. The dual underlayment system consists of a composed base board and a smooth top board combining to create a complete waterproof leveling and sound reduction system.
