S-3000
REFLECTIVE WALL PANELS

Sound Quality® S-3000 Reflective Panels are used in applications where sound reflection is necessary to enhance the rooms’ acoustics. These flat reflector panels are commonly installed in areas such as: auditoriums, concert halls and churches.

S-3000 Reflective Wall Panels are frequently used in conjunction with our S-2000 absorber panels. By combining both the S-3000 and S-2000 panels you reflect and absorb excessive sound, resulting in the improvement of sound quality and speech understanding.

S-3000 panels are manufactured with an MDF core in thickness to match S-2000 panels or standard thickness of 1/2” and 3/4”, with sizes up to a maximum of 4’ x 10.’ (They can also be manufactured with built up edges to match the thickness available in our S-2000 panels).

The edges are fully wrapped in standard, designer or C.O.M. fabric with 4 edge detail options. S-3000 panels are easily installed on walls with a two-part mechanical clip or nails and construction adhesives.

APPLICATIONS:
• Auditoriums
• Concert Halls
• Churches
• Band/Choir Rooms
FINISHES
Guilford of Maine FR701 Style 2100 is the industry standard. Hundreds of approved decorative fabrics are also available from numerous manufacturers including, but not limited to: Guilford of Maine, Maharam, Design Tex and Knoll. Customers may also specify their own fabric, provided the material meets manufacturing requirements.
