These installation suggestions consist of a common process for TRI-HEX installation. Installers should rely upon their own professional experience and understanding of their unique requirements to ensure a successful installation professional experience and understanding of their unique requirements to ensure a successful install.

### Tools Needed

- **Level**
- **Putty Knife**
- **Construction Adhesive***
- **Straight Edge**

*Liquid Nails (heavy duty) or Robert 3095 Carpet Adhesive*

### Items Included

1. Measure the length and height of the wall. Find center of the wall.
2. Lay the TRI-HEX down on the ground and flip the puffed face down.

3. Use the putty knife to place the carpet adhesive to one TRI-HEX at a time. Working on one TRI-HEX at a time, apply a liberal amount of adhesive to the back of the panel utilizing the adhesive manufacturers best practices.

4. Position the TRI-HEX on the wall on predetermined location. Hold it until it's dry. Continue similar procedure for the rest of the TRI-HEX's.

* Robert 3096 Carpet Adhesive or Liquid Nails (heavy duty)
