1. Lay out the panel location.

2. Determine EC-2 bracket / EC-4 bar locations on panels.

3. Secure the EC-2 bracket / EC-4 bar to the ceiling with screws.

4. Slide the EC-1 brackets on the panels onto the ceiling reference lines. (Bracket dimensions on drawings)

5. On wall, line up with EC-1 bracket locations.

6. Apply a small amount of adhesive on both parts of the brackets. Then slide brackets together.

7. Panel.
