

CHROMA[®]

ACOUSTICAL WALL & CEILING PANELS

Sound Quality S-2100 panels with Chroma finish are the perfect solution where a traditional fabric finish is not desired. The acoustically transparent, paintable finish blends well with finished drywall to create a space absent of echo and reverberation. Rather than a textured finish of fabric, Chroma panels provide for an understated, more discreet acoustic finish within a space.

Chroma finish by Sound Seal is part of a Class A rated system tested per ASTM E-84. In standard Signature White or any Pantone color, Sound Quality Chroma finished panels provide absorption required to create an acoustically correct space. Available in 5/8", 1-1/8", 1-5/8" and 2-1/8" Sound Quality S-2100 panels in Chroma finish provide a range of NRC values suited to any acoustical solution.

- Excellent acoustical performance
- Class A fire rated per ASTM E-84
- Various mounting options
- Custom sizes and shapes

APPLICATIONS

- Schools/Universities
- Auditoriums
- Houses of worship
- Office spaces
