

Sound Seal Introduces Acoustical Resonators

Resonators to be added to the Architectural product line

AGAWAM, Mass. – February 27, 2018 – [Sound Seal](#), a leading manufacturer of noise control products serving the industrial, architectural, commercial and construction industries, announced today the introduction of Acoustical Resonators. The Resonators the newest addition to the Sound Quality product line.

Sound Quality Acoustical Resonators are highly effective, low frequency cylindrical ceiling absorbers used to quiet reverberant rooms. These attractive units have an acoustical rating of 8.45 sabins per unit and are available in a wide variety of colors and fabrics. Resonator units are 12" in diameter, 24" long and weigh approximately 6 pounds. They are typically installed horizontally by suspending each resonator from the ceiling independently from the roof deck using 16 gauge wire.

"We are excited to add acoustical resonators to our architectural product offering," said Dave Ingersoll, Business Development Manager for Sound Seal. "This is a unique alternative to fabric wall panels and offers our customers another option to add acoustic value to their space without compromising aesthetics".

We also offer these resonators with a custom printable option. Add your company logo or any graphic you would like to personalize the messaging and the look. Sound Quality Resonators are the perfect acoustic and aesthetic solution for various interior noise reducing applications.
