WOODGRILLE® EMBRACE TRADITION.

A traditional linear wall and ceiling product, WoodTrends WoodGrille combines the warmth of wood with excellent acoustical values. Each WoodGrille panel is a combination of solid wood and veneered MDF blades spaced to give WoodGrille its distinctive look.

LINEAR DISTINCTIVE LINES.

With its parallel straight lines, our Linear product creates a clean and continuous aesthetic look while achieving NRC values as high as 0.90. The system is built on an MDF core finished with two coats of a UV-polyacrylate lacquer. Choose either planks or panels.

STANDARD WARM & INVITING.

WoodTrends Standard is a traditional wall and ceiling panel that combines the warmth of wood with excellent acoustical values. The product consists of an MDF core material with a face veneer and a rear balancing veneer. The applied finish is two coats of UV-polyacrylate clear lacquer for a natural and polished look.

TIMBER-STIX™ ENGINEERED EXCELLENCE.

You only get one chance to make a first impression. With Timber-Stix, it's always a good one. These wood-veneered acoustical panels are comprised of a wood-veneered MDF board facing and a backing made from 100% Polyethylene Terephthalate (PET), a 100% recyclable material.

SELECT AN EASY CHOICE.

WoodTrends Select is a genuine wood veneered concealed grid ceiling panel system. Installed on typical z-bar, WoodTrends Select creates a continuous ceiling with panels defined by a small 2mm bevel on all edges. This system can be designed to complement casework, doors, and even furniture.

BASIC CLASSIC ELEGANCE.

WoodTrends Basic System for T-Grid Ceilings features a genuine wood veneer on an MDF substrate with a generic balancing veneer on the back side. The Basic is a lay-in style panel with a tegular edge detail designed for installation in a standard intermediate duty 15/16" or 9/16" T-grid. State-of-the-art CNC machinery produces round or elongated perforations to achieve optimum acoustical results.

soundseal.com/basic

ELITE ELEGANT & EFFECTIVE.

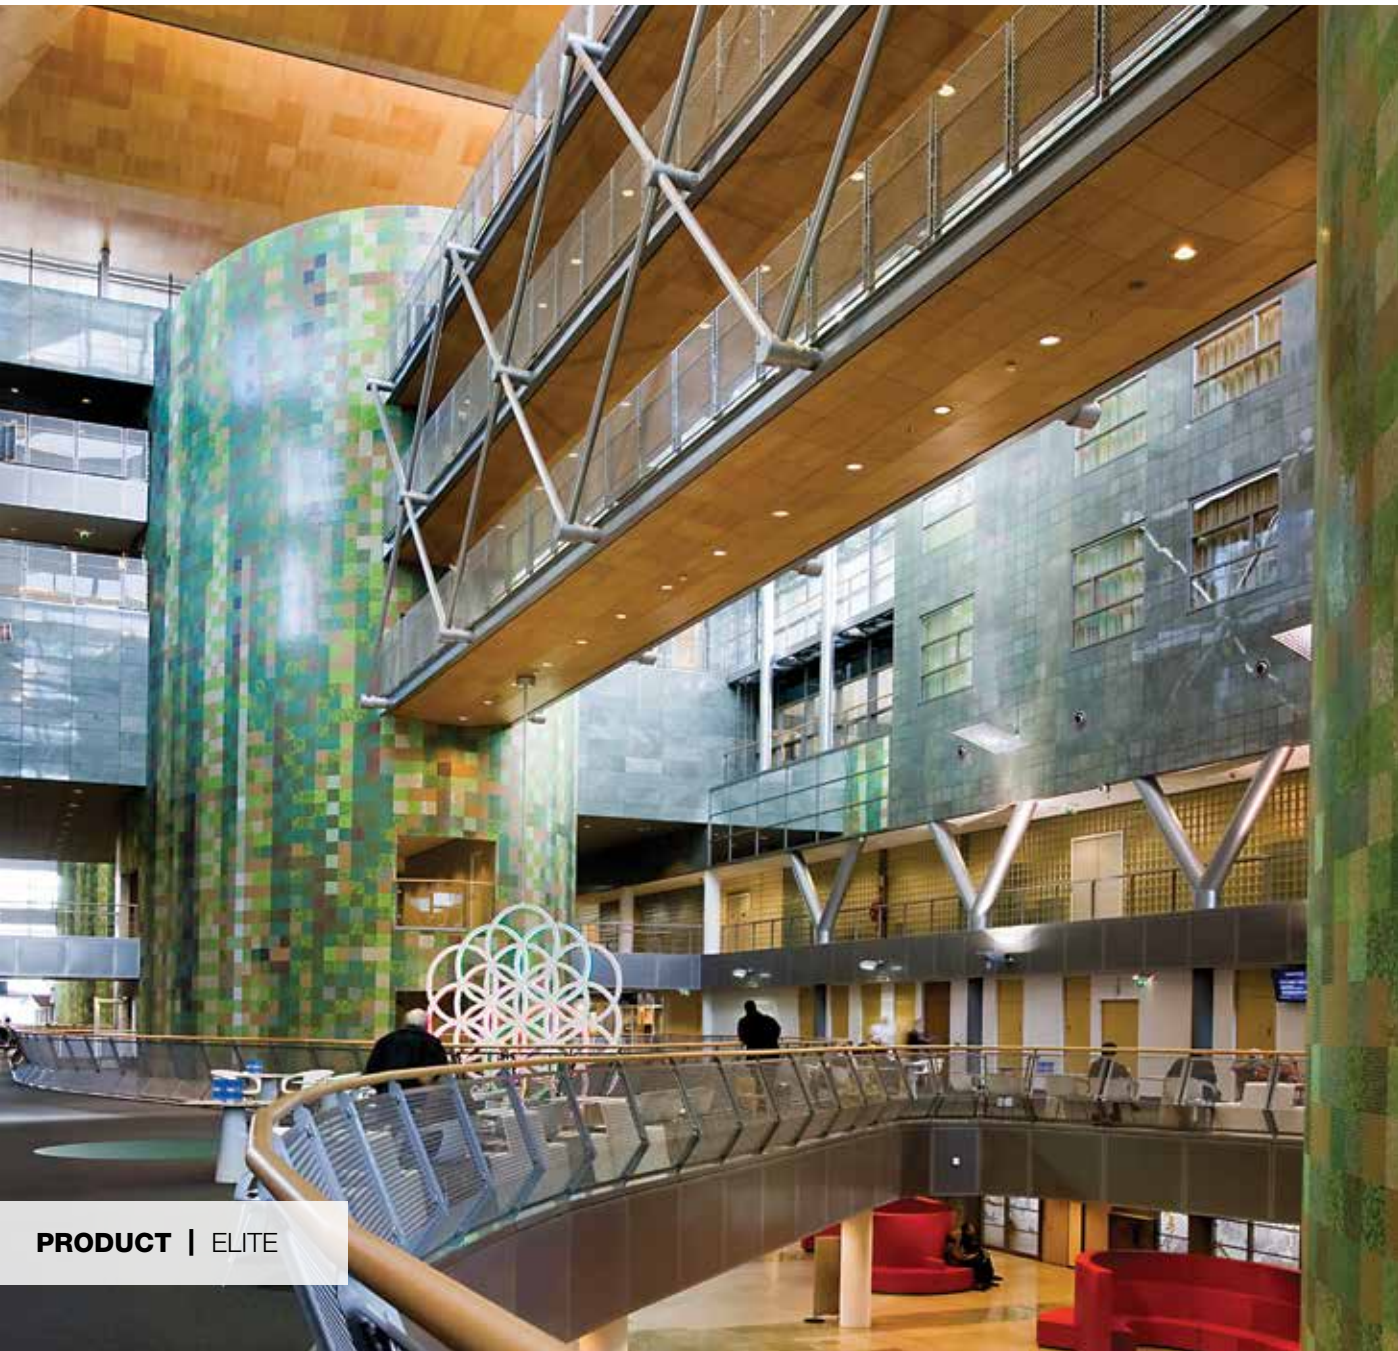

WoodTrends Elite Ceiling Panel System creates a genuine wood veneered ceiling, easily installed into a standard 15/16" T-grid, leaving a 3/8" pencil line reveal between panels. This system is built on MDF core with a 0.6mm veneer thickness.
